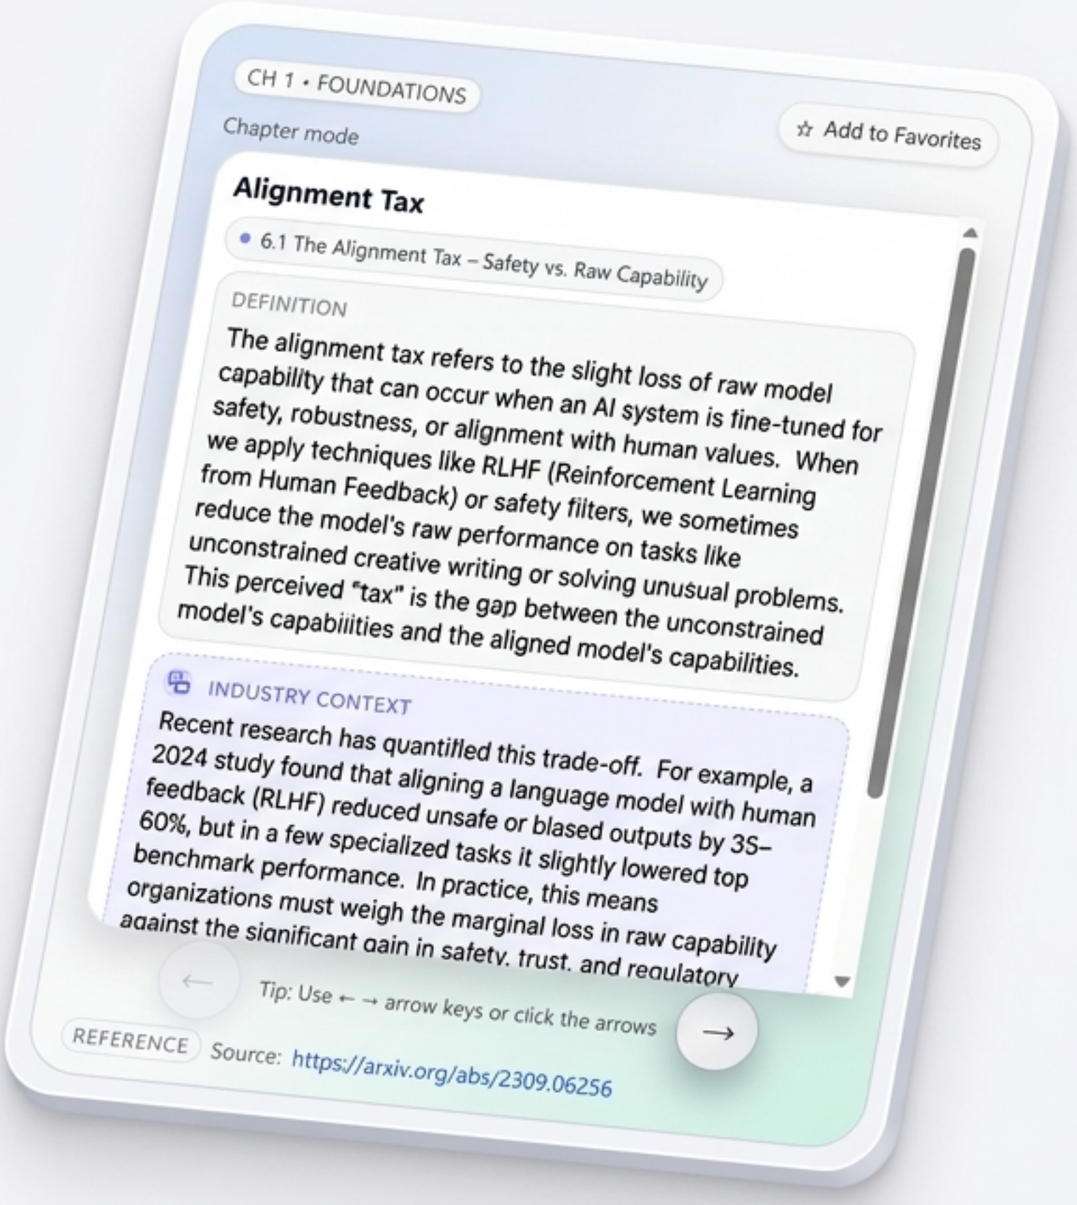
Generative AI Terminology Navigator

Go Beyond Definitions. Master the Concepts.

A purpose-built reference app for knowledge workers, professionals, and students. Designed for deep reading, quick lookups, and personal annotation, it helps you understand and revisit key concepts from the *Generative AI Professional Guide*.

Key Capabilities

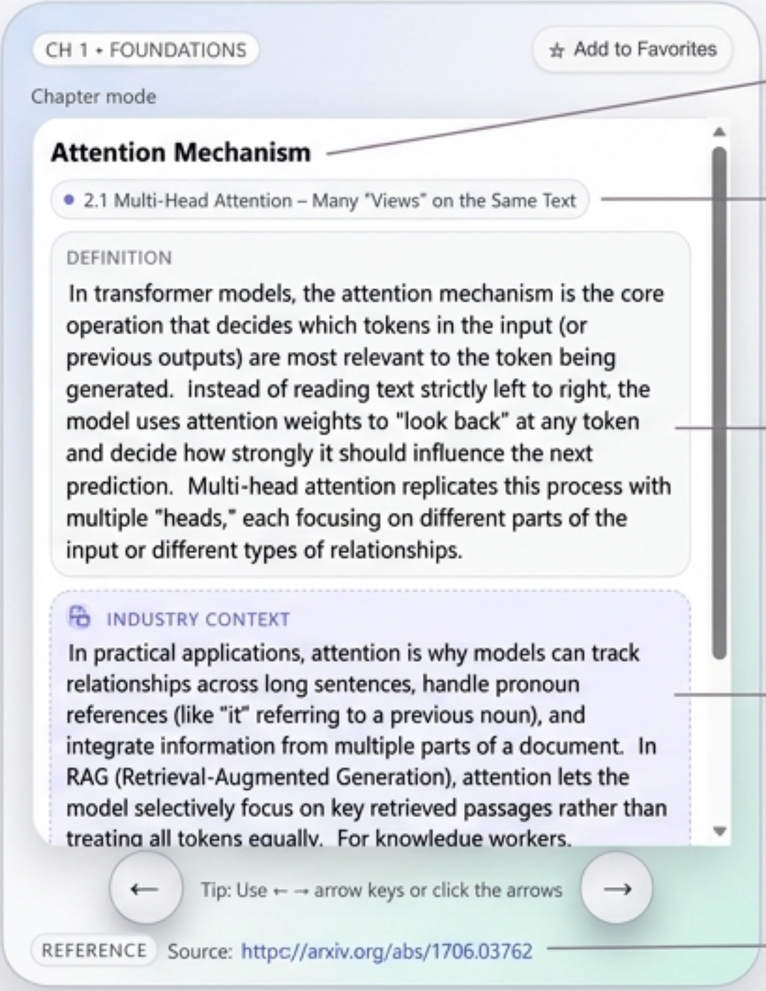
- Browse by Chapter
- Build a Personal Favorites List
- Highlight & Distill Takeaways
- Track Your Learning with Analytics



NotebookLM

Every Term is a Comprehensive Briefing

The app shifts from simple flashcards to rich 'Term Sheets.' Each card is a complete, scrollable surface containing everything you need to understand a concept in depth.



Term Name: The core concept.

Textbook Section Tags: Pills that connect the term back to its source in the Guide.

Full Definition: A complete, textbook-grade explanation.

Industry Context: Real-world examples and practical relevance, often with a distinct visual treatment.

Source Reference: A clickable link for deeper reading.

NotebookLM

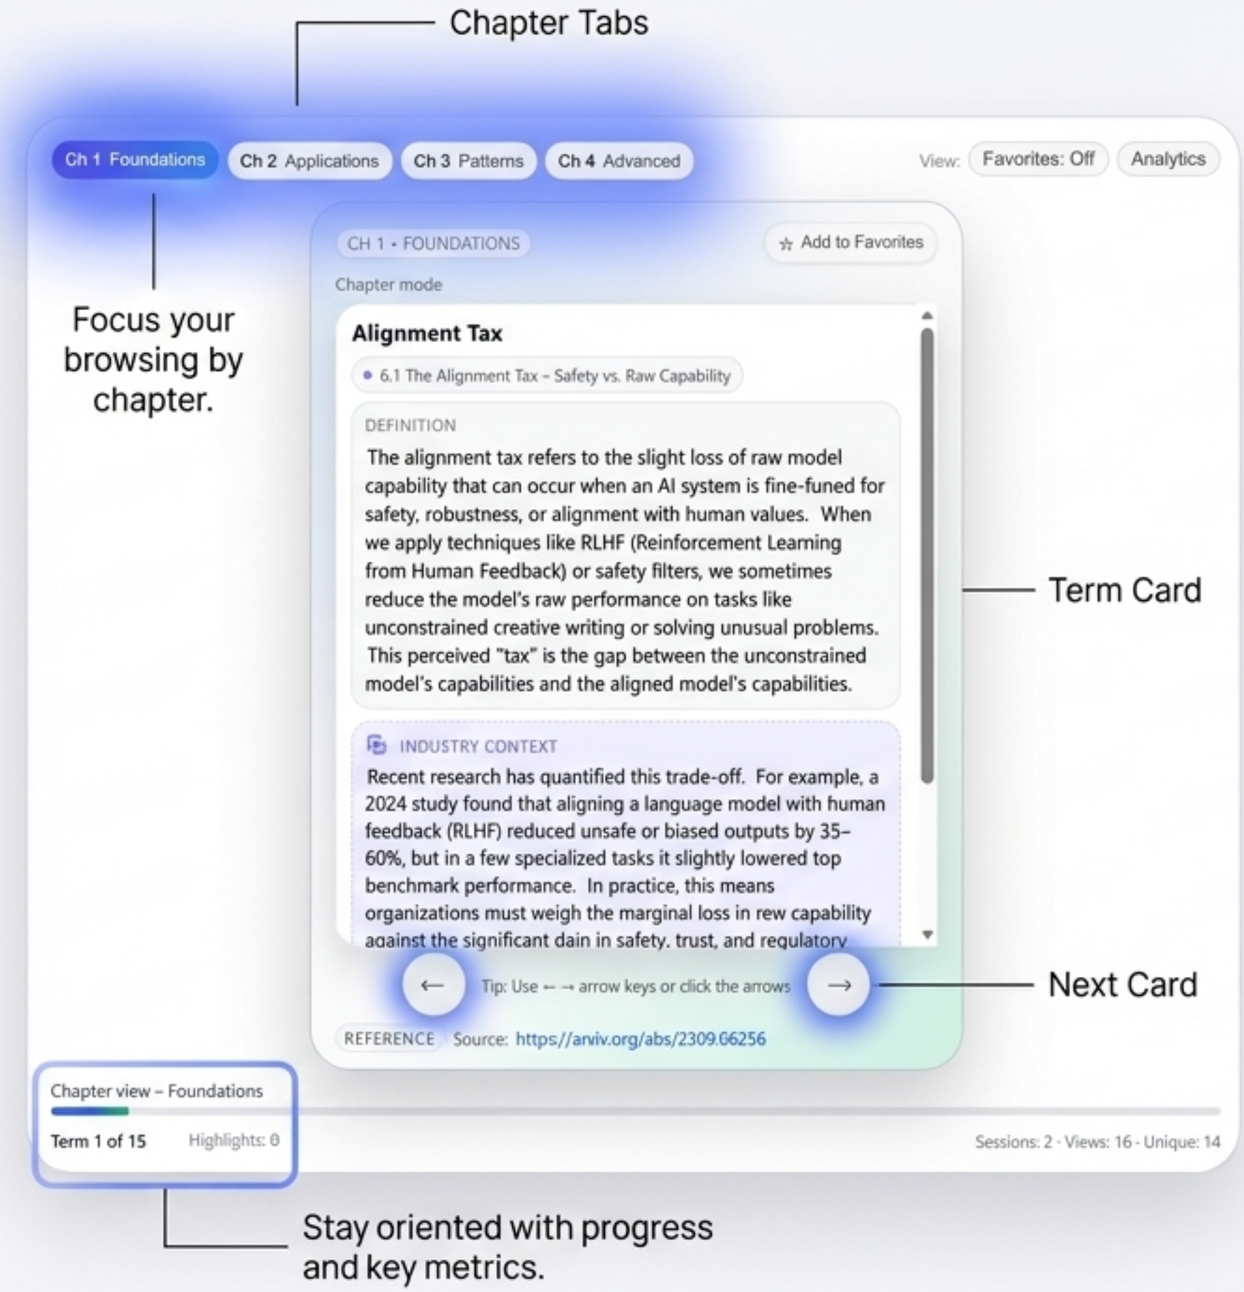
Seamlessly Explore Knowledge by Chapter

The interface is designed to be simple and powerful, supporting tap, click, keyboard, and swipe interactions.

Navigation Methods

On Desktop:
Use Next/Previous arrows or Left/Right arrow keys.

On Mobile/Tablet:
Swipe left and right to move between terms.



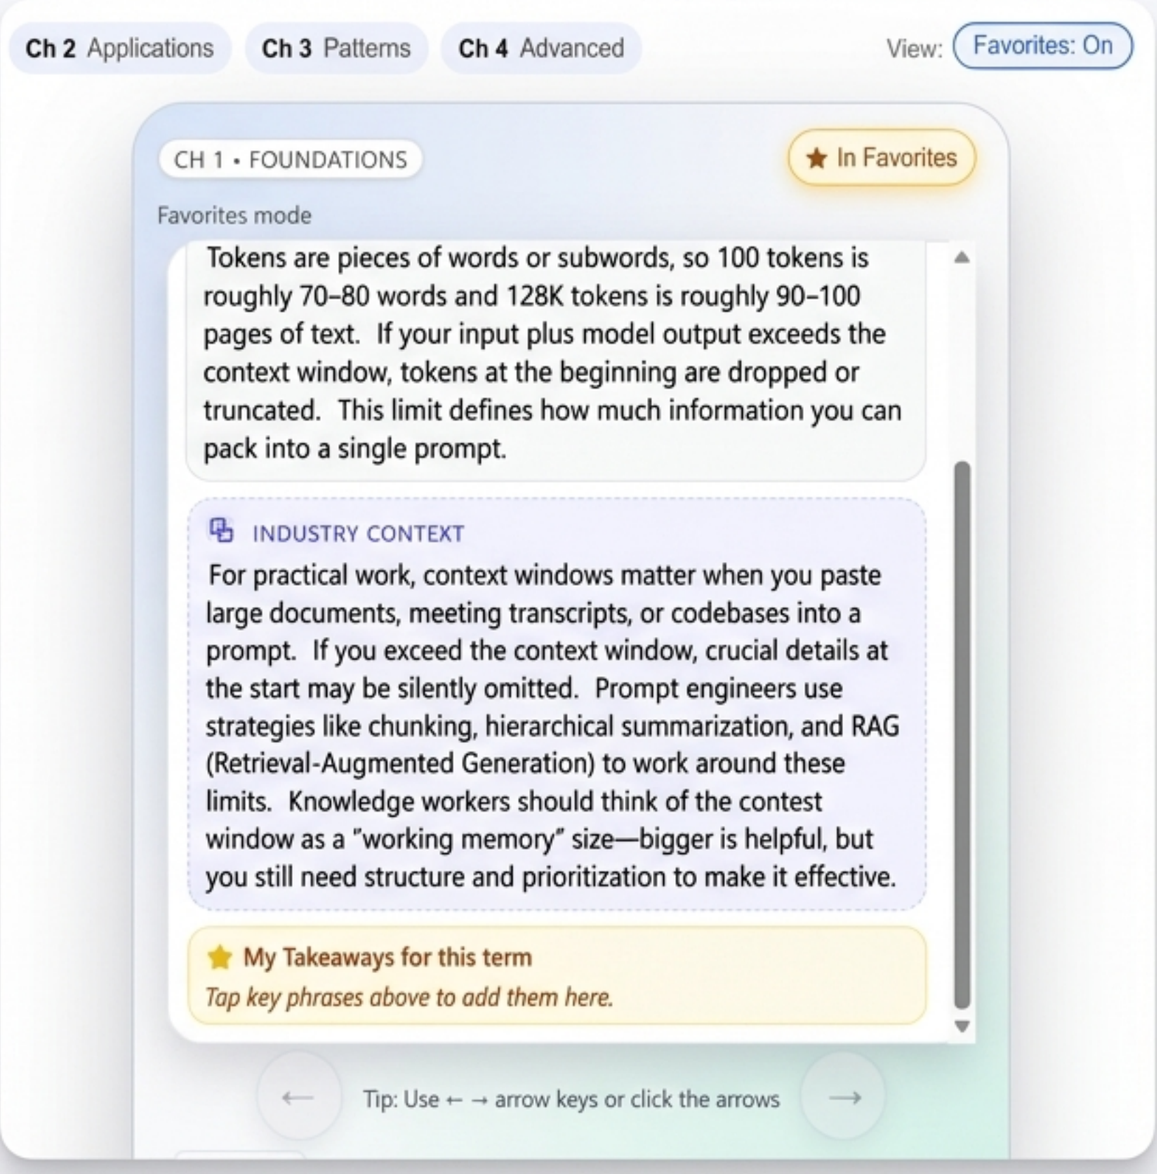
NotebookLM

Build Your Personal Cross-Chapter Reference List

The Favorites system lets you bookmark the most important terms to create a custom study guide that spans all chapters.

1. **To Add:** Tap the star icon (☆) at the top-right of any card. It will fill in (★) to confirm the term is saved.
2. **To View:** Use the 'Favorites: On' toggle at the top of the screen. This switches from the standard chapter view to a combined stream of all your bookmarked terms.

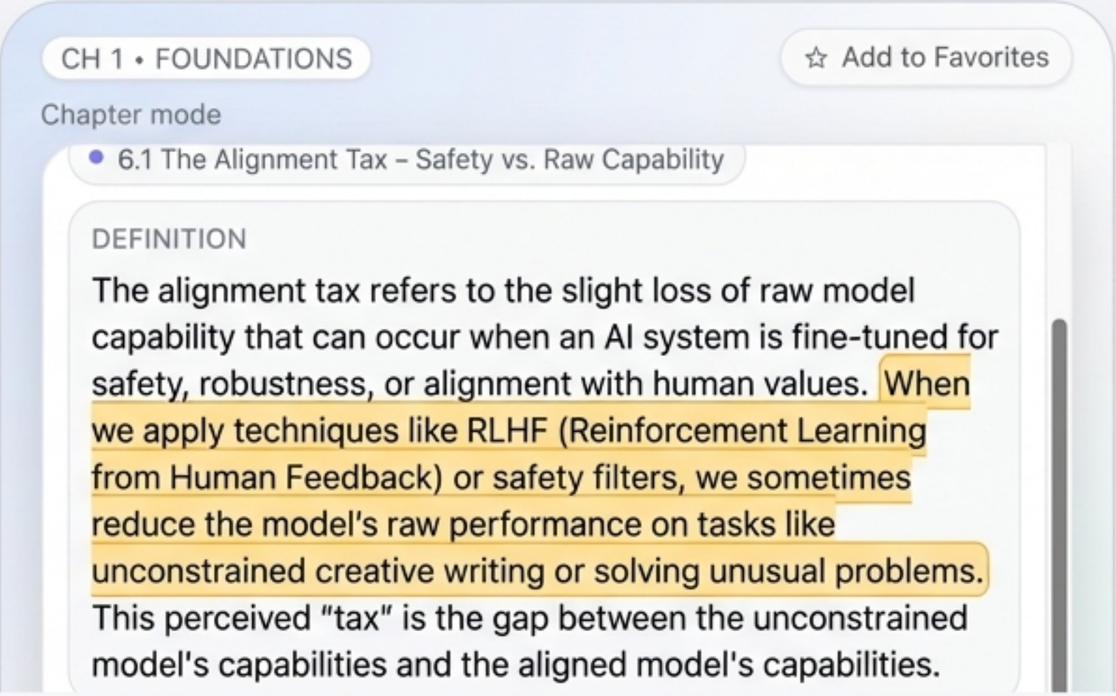
> When Favorites view is active, the progress label changes to 'Favorite X of Y,' so you can easily track and review your curated list.



NotebookLM

Transform Passive Reading into Active Curation

> "This interaction transforms reading from a passive activity into **active curation**, supporting deeper understanding and better long-term retention."



- Tap or click on pre-defined text chunks to apply a highlight.
- Tap or click again to remove it.
- On desktop, you can also use ENTER or SPACE on a focused phrase.

NotebookLM

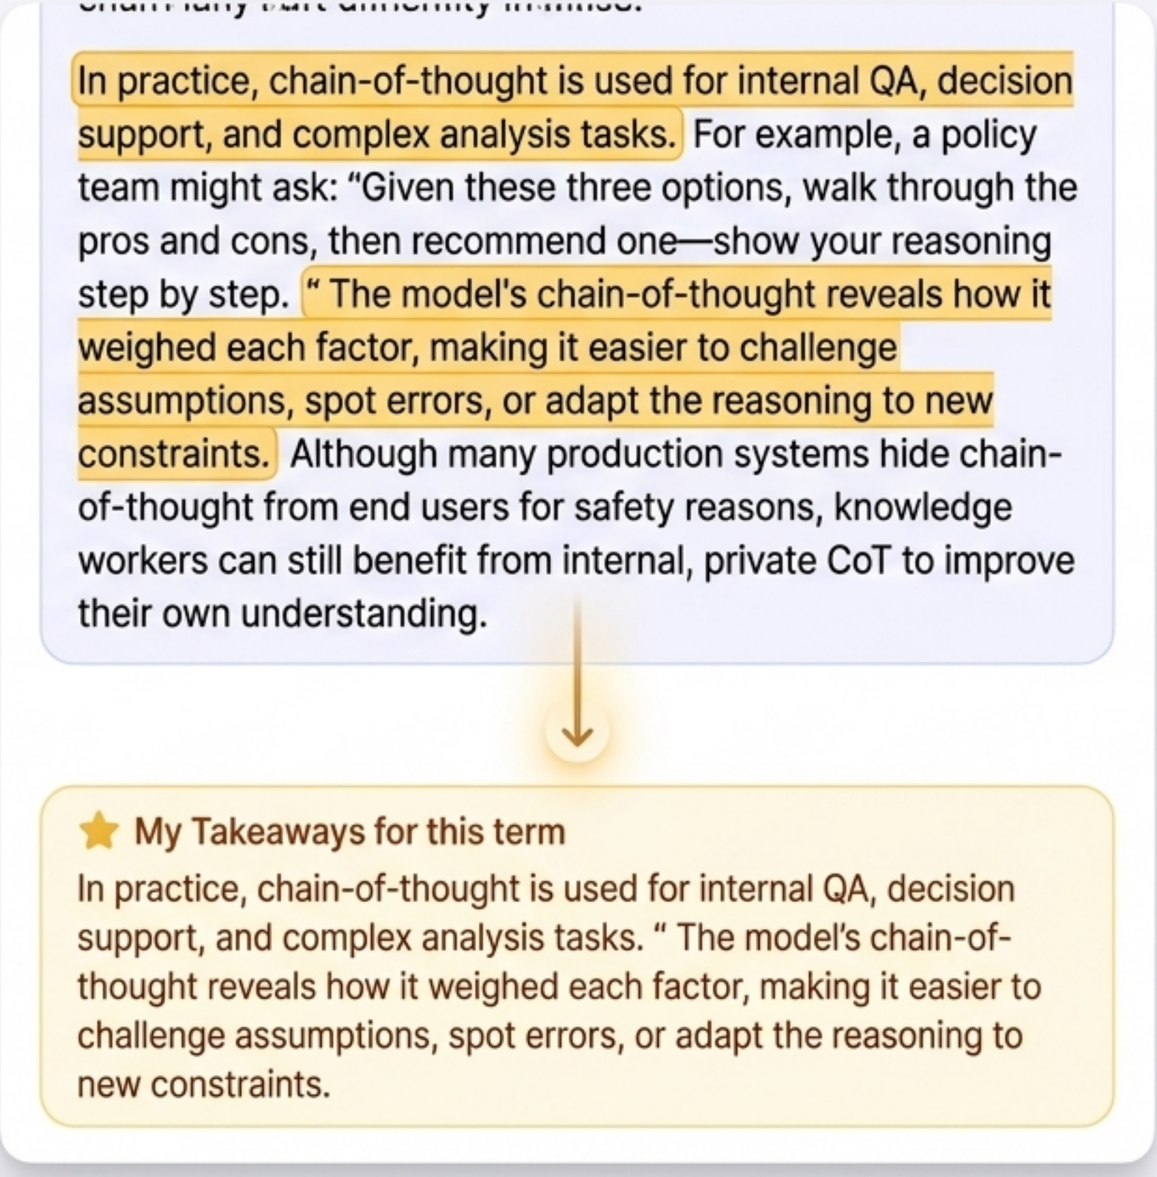
Instantly Distill Your Own Key Insights

As you highlight phrases, the app automatically collects them into a dedicated "My Takeaways for this term" panel at the bottom of the card.

Process description:

- **Before**: The panel shows a gentle prompt: "Tap key phrases above to add them here."
- **After**: The panel populates with your selected text, creating a concise summary.

This turns a long reference entry into a 'personalized, distilled version of the concept," capturing exactly what matters to you. Your highlights and takeaways are saved for each term automatically.

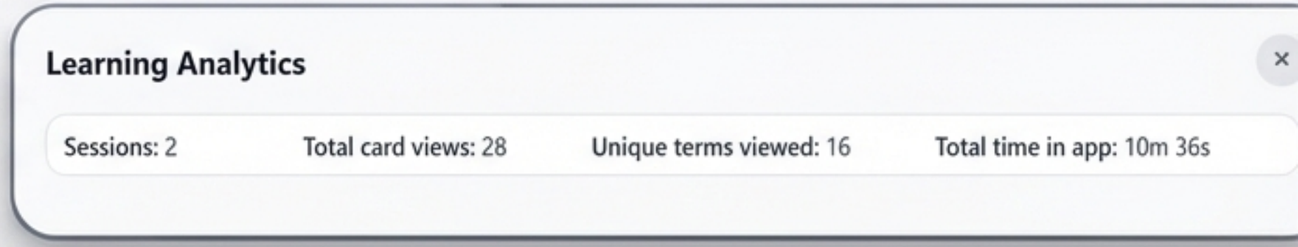


NotebookLM

Understand Your Learning Habits with Personal Analytics

The app quietly records a few lightweight, privacy-preserving metrics to help you understand how you're using it and where you're spending your attention. All data is stored locally in your browser.

- **Sessions**: How many days you've opened the app. A measure of habit.
- **Total card views**: Your overall activity level.
- **Unique terms viewed**: How broadly you are exploring the content.
- **Total time in app**: Your cumulative engagement.

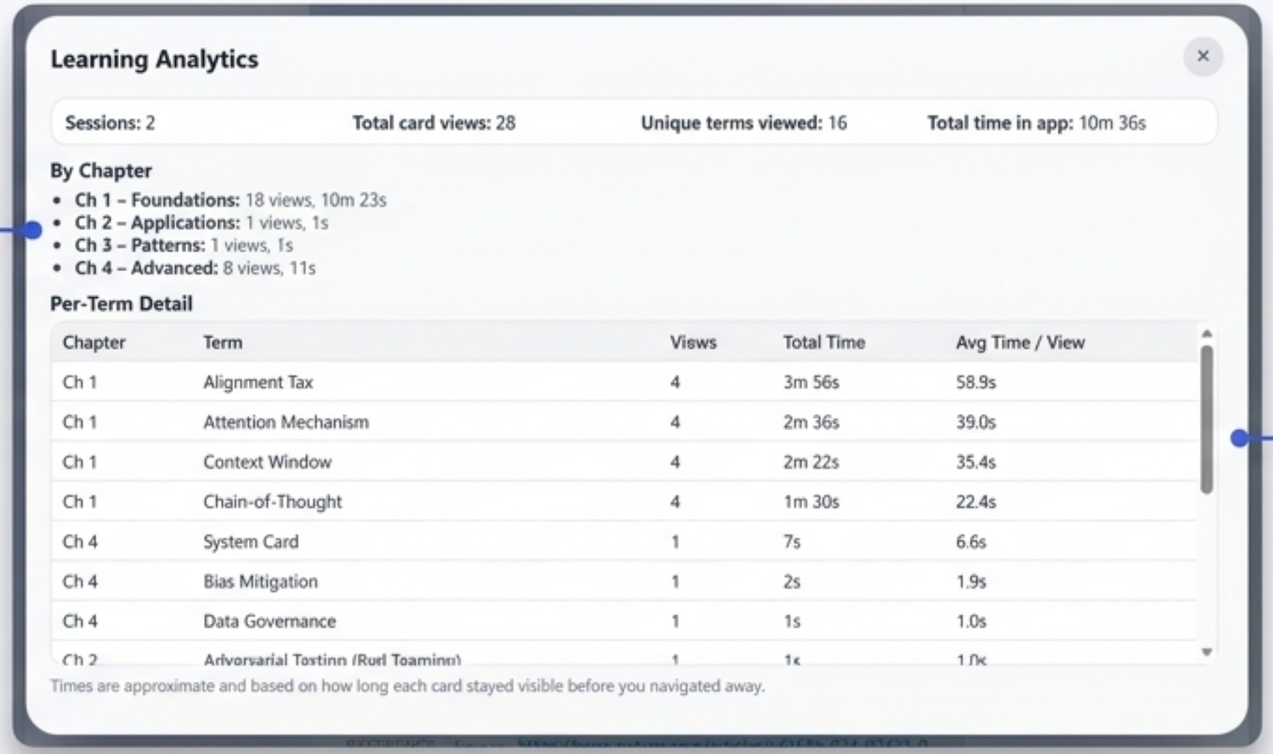


NotebookLM

Pinpoint Your Focus and Identify Areas for Review

By Chapter:

See total views and time spent in Foundations, Applications, to understand your primary areas of focus.



Learning Analytics

Sessions: 2 | Total card views: 28 | Unique terms viewed: 16 | Total time in app: 10m 36s

By Chapter

- **Ch 1 – Foundations:** 18 views, 10m 23s
- **Ch 2 – Applications:** 1 views, 1s
- **Ch 3 – Patterns:** 1 views, 1s
- **Ch 4 – Advanced:** 8 views, 11s

Per-Term Detail

Chapter	Term	Views	Total Time	Avg Time / View
Ch 1	Alignment Tax	4	3m 56s	58.9s
Ch 1	Attention Mechanism	4	2m 36s	39.0s
Ch 1	Context Window	4	2m 22s	35.4s
Ch 1	Chain-of-Thought	4	1m 30s	22.4s
Ch 4	System Card	1	7s	6.6s
Ch 4	Bias Mitigation	1	2s	1.9s
Ch 4	Data Governance	1	1s	1.0s
Ch 2	Adversarial Testing (Red Teaming)	1	1s	1.0s

Times are approximate and based on how long each card stayed visible before you navigated away.

Per-Term Detail:

A table lists every term you've viewed with its total views, total time, and average time per view. Use it to find terms you read deeply or only glanced at.

How to Use This Data

Identify terms you read often (indicating interest or difficulty), spot terms you may want to revisit, and notice patterns in your learning focus over time.

NotebookLM

Integrate Terminology Mastery into Your Workflow

For Quick Reference During Work

- Jump to a chapter, find your term, and skim the Definition.
- Read the Industry Context carefully for practical application.
- Highlight key use cases to create an instant 'My Takeaways' summary.

For Focused Learning Sessions

- Move through a chapter, highlighting the 'essence' of each concept.
- Add foundational terms to Favorites for later review.
- Periodically check Analytics to see where you've spent the most time.

For Meeting or Workshop Prep

- Use Favorites view to quickly rehearse key terminology.
- Check Analytics for terms with low average view times—these may need a closer look.
- Use your 'My Takeaways' strips as talking points.

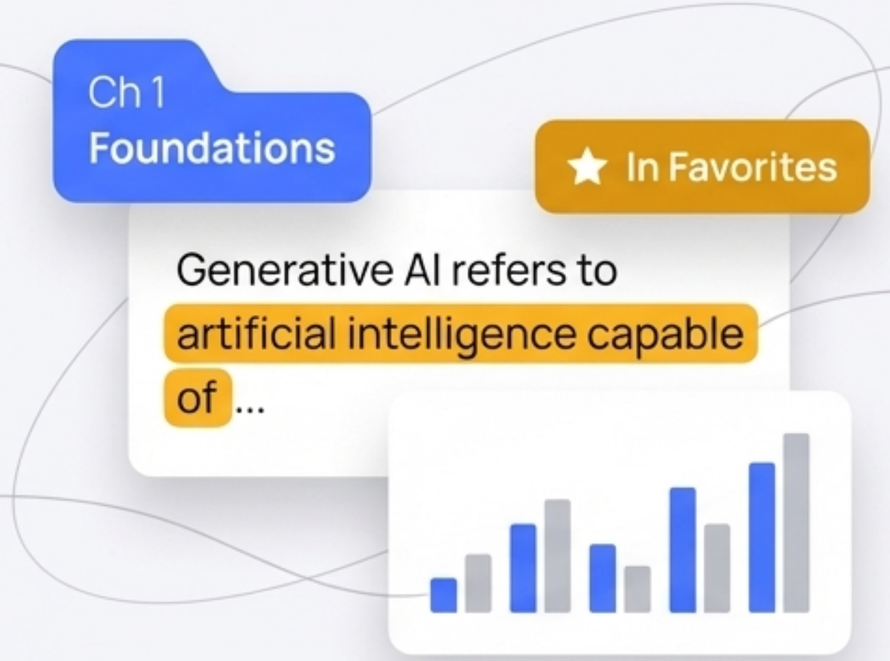
NotebookLM

Simple at First Glance, Powerful as You Grow

The Generative AI Terminology Navigator is designed to support you at every stage of your learning process.

Chapter tabs keep you oriented.

Favorites create your personalized reference list.



Highlights & My Takeaways prompt you to actively curate what matters.

Analytics show how your understanding evolves over time.

Open the app, choose a chapter, and begin a structured, interactive terminology experience that supports real-world Generative AI practice.
